Execution & Test Run of Program to Access TTS:

The screenshot displays a Python IDE with two windows. The left window, titled 'texttospech.py - C:\Users\ELCOT\Desktop\texttospech.py (3.10.2)', contains the following Python code:

```
from ibm_watson import TextToSpeechV1
from ibm_cloud_sdk_core.authenticators import IAMAuthenticator
authenticator = IAMAuthenticator('2nbbkCOYWGcsaW7gJiIoyDSQgUIXG6-uuV')
text_to_speech = TextToSpeechV1(authenticator=authenticator)
text_to_speech.set_service_url('https://api.au-syd.text-to-speech.watson.cloud.ibm.com/voice/v1/text-to-speech')
with open('hello_world.wav', 'wb') as audio_file:
    audio_file.write(
        text_to_speech.synthesize(
            'Take Rantac D Now',
            voice='en-US_AllisonV3Voice',
            accept='audio/wav'
        ).get_result().content
    )
```

The right window, titled 'IDLE Shell 3.10.2', shows the output of the program's execution:

```
